# Company Introduction

Established in 2009, **Ekhmad Trading Co. L.L.C.** is one of the leading Engineering and Supplier in electro-mechanical Products and Equipment. Being experts in our field, this knowledge has enhanced the development of our innovative design providing High-quality Products, Systems and Security Solutions. Ekhmad provides all types of electro-mechanical Systems serving in Industries, Commercial Tower & Buildings, Hospitals, Malls, Compound & Villas. Ekhmad continuously works with certification bodies, government regulatory, partners and technology associations in efforts to provide innovative and quality products that assures accuracy in performance from extensive product testing and evaluation and continued product quality compliance with Standards. Our mandate is to secure you, your staff and your investment from any type of hazards.

We are already one of the best fire and security risk management the organization through the provision of fire detection, protection and extinguish systems and in the deployment of Safety and Security systems in Saudi Arabia. In doing so, we seek to ensure that all products and services provided are of the highest standard and exceed the requirements of its customers at all times. We also focus on the health and safety of its employees, customers, contractors and third parties are protected at all times. Our products and systems that deployment the highest environmental and international standards applicable to fire detection, fire extinguish products and security systems. Ekhmad delivers assured quality and reliability to all its customers at all times.

We are dynamic company committed to ensuring first-class services to our clients.

We are proud to have been trusted by many reputable clients & partners domestically and regionally as well.

Our commitment to outstanding job complication, excellent customer service and unparalleled safety performance has made us a partner of choice in electromechanical industry. We are specialized and certified in Electro-Mechanical in Electrical, Mechanical, Maintenance for systems and Trading

# Introducing Engineering Solutions

## Projects Department

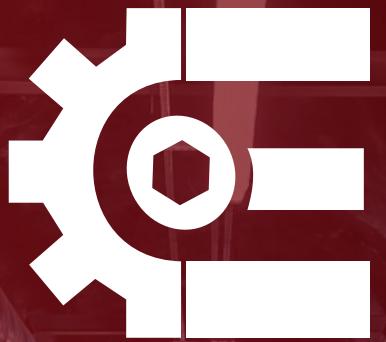

Responsible for the planning, execution, and completion of electro-mechanical projects in accordance with approved drawings, specifications, schedules, and applicable standards, ensuring quality, safety, and timely delivery.

## Maintenance Department

Provides preventive and corrective maintenance services to ensure continuous, safe, and efficient operation of installed electro-mechanical, fire, and security systems, in compliance with regulatory and manufacturer requirements.

## Technical Office

Handles engineering design, technical submittals, shop drawings, material approvals, and coordination with clients, consultants, and authorities to ensure full compliance with project specifications and statutory regulations.

**EKHMA<sup>®</sup>**

# About Ekhmad

## Our Mission

We have been in the market and serving all over kingdom of Saudi Arabia and making our customer happy, we focus on providing the services with highest efficiency, equipped with latest technologies and making sure safety, security and Quality is being maintained highly

## Our Vision

Our continues progress have made us reached very top and with every moment we progress we create opportunities and progress that everyone desire.

## Our Aim

We Aim to reach the satisfaction of global needs as our trading is trading internationally and we are progressing to reach the ultimate choice of global and locals. Always focused, hard and smartly worked and recognizing as successful achiever.

We are focused on hardworking, doing things smartly with dedication

# Future of the Company

We all have our future designed..

Here in Ekhmad we design together, we build together, we grow together and pave the path to venture into advancements.

With the help of our clients, engineering teams, business Partners we are here to build the better tomorrow. Learn and discover the new ways to secure your property and goods.

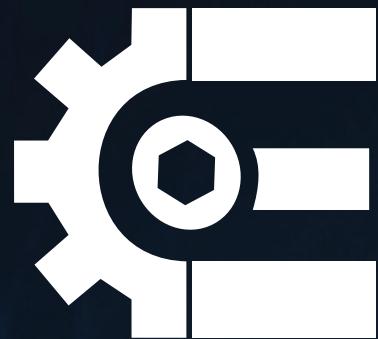

Equipping ourselves with newer and better technologies, tools and methods and becoming the best at what we do.

## Why Choose Us?

With the reputation of being one of the best in the kingdom and having thousands of customers we are always maintaining and meeting their requirements and on top of that we always tailor or experiences, upgrade our teams knowledge, calibrate, maintain and making sure of proper use of tools in proper places.

With all being said our reputations have brought us some major clients to our services list and still more adding to the list. And we are always looking forward to serve other clients in same manner with professional perspective.

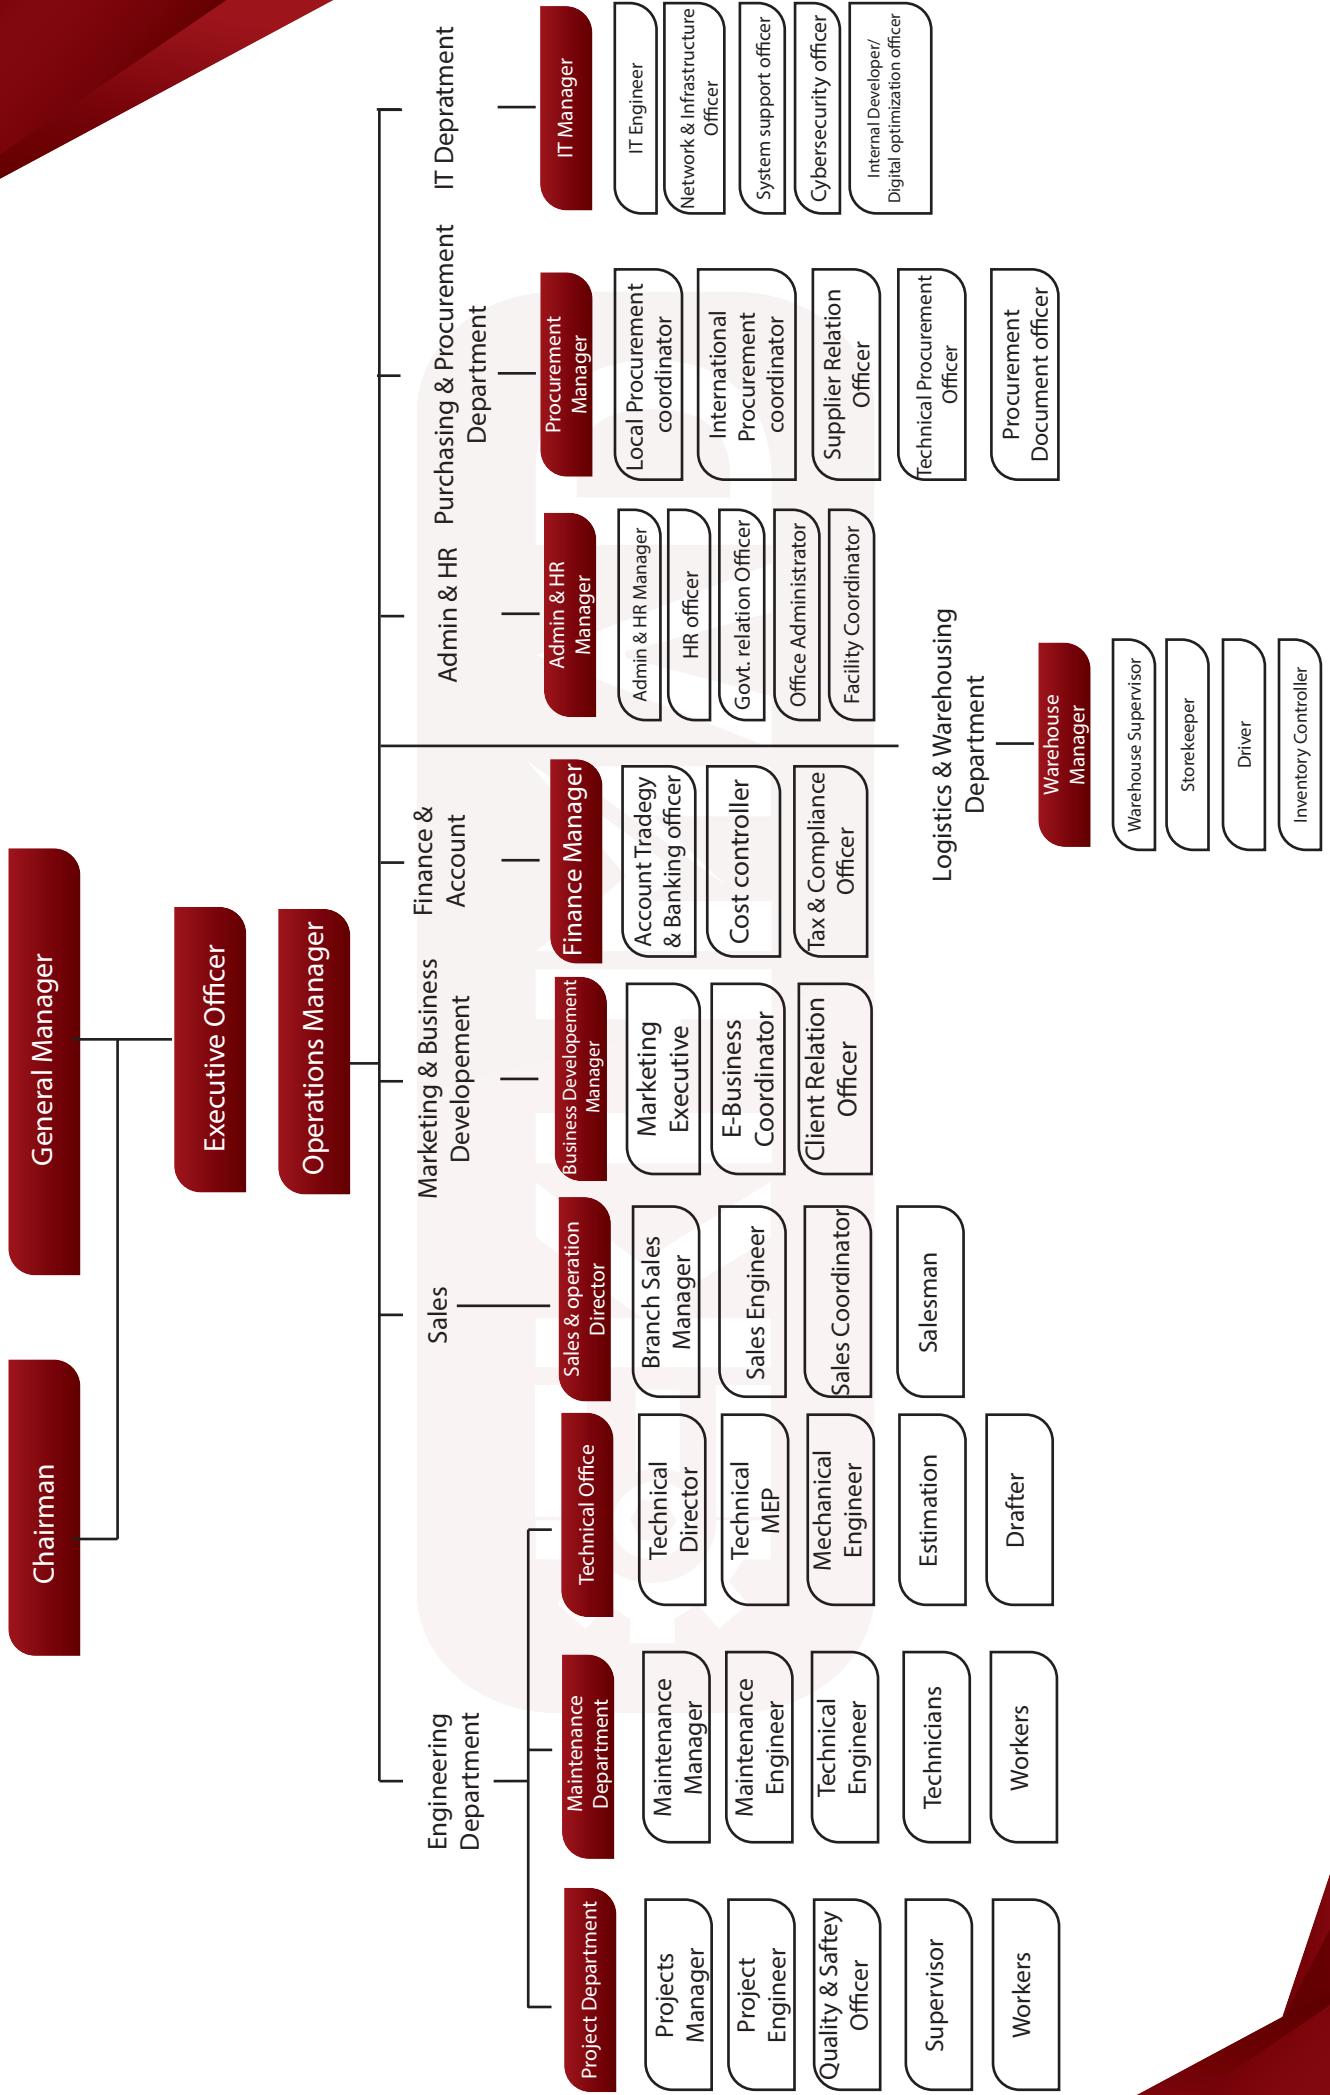

**EKHMAD®**

The logo consists of the word "EKHMAD" in a bold, white, sans-serif font. The letter "E" is replaced by a stylized gear icon where the top bar is split into two segments meeting at a central hexagonal hole. A registered trademark symbol (®) is located at the top right of the "D".

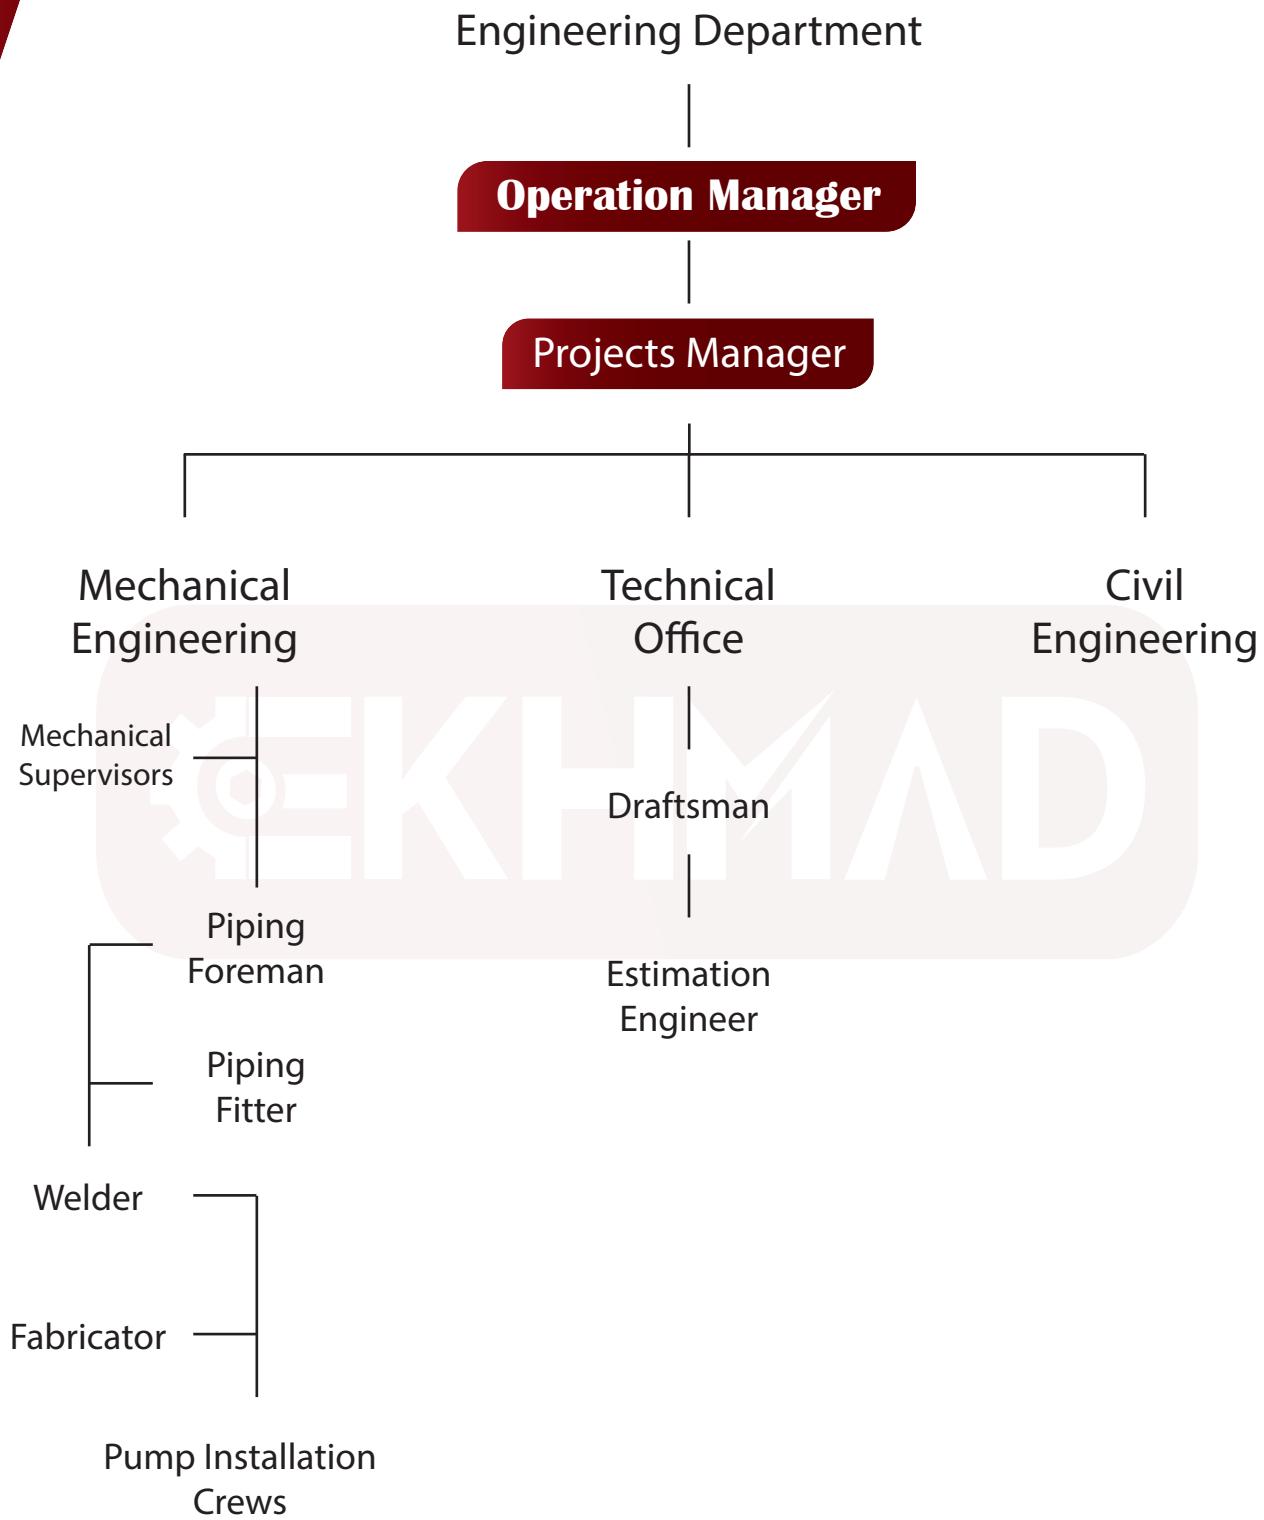

**Ekhmad  
Structured**

A large, modern city skyline at night serves as the background for the text. The most prominent building is a skyscraper with a distinctive red and orange striped facade and a unique, curved, spiral-like top. The city lights reflect off the water in the foreground.

Use of Company Resources

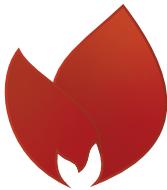

**EKHMAD®**

**Ekhmad**

**Scope**

**Explanation**

## FIRE FIGHTING

A fire fighting system is an activity of prevention during a fire spread in building, home, warehouse, commercial or industries with the use of proper fire safety equipment like extinguisher, hose reels, fire monitors, nozzles and hose pipes. Along with those installation of complete system network to cover large areas to create system that protect and prevent fire disasters.

## H.V.A.C

HVAC systems are designed to move air, heating or cooling an indoor space in the process. These systems generally have three major elements: a heating unit, cooling unit, and duct to move the air. Moreover Engineering explains that an H.V.A.C system starts with the ventilation that brings fresh air into a building in and out refreshing the facilities

## AIR COMPRESSION

Compressed air is a form of stored energy that is used to operate machinery, equipment, or processes. Compressed air is used in most manufacturing and some service industries, often where it is impractical or hazardous to use electrical energy directly to supply power to tools and equipment.

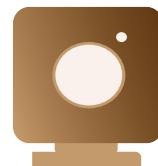

## Company Scope Explanation

### FIRE DETECTION

Fire alarm system consists of manual pull stations, visual/audible alarm devices and integrated automatic detection devices; addressable smoke detector/sounder bases and heat detectors located in individual sleeping rooms, corridors, common areas and mechanical spaces.

### LOW CURRENT

The Low Current System, also known as the Extra-Low Voltage system, is a branch of Electrical Engineering that deals with systems that operate using low current signals with extra-low voltage. These systems can be found in a variety of settings, from small end points to large central control systems.

### CLEAN AGENT FIRE SUPPRESSIONS

Compressed air is a form of stored energy that is used to operate machinery, equipment, or processes. Compressed air is used in most manufacturing and some service industries, often where it is impractical or hazardous to use electrical energy directly to supply power to tools and equipment.

# Company Service

## What do we do in our Contracting Sector?

### We construct your Systems

Contracting is our key stone of reaching industry, with our experiences we are here to develop your systems. We got latest technologies and always improving teams to build your protection systems from scratch to finish point. Always here to serve with betterment of our partners.

### We Design your Systems

With the help of our expert estimation and drafting engineers, we are always available to receive your requests. Either it is available design to estimate or to create from scratch we can provide you with our 15+ years of experience.

### We Maintain your Systems

We have our experts teams standby to provide you maintenance scope for the existing system or newly made. We are always a click/ phone away. Let us know about your systems and we will take care for the maintaining it.

### We provide Consultation

Our experts can provide you consultation to your requirements and provide decisive planning and strategies to create a effective systems which will perfectly fit your projects and solve fire fighting and detection problems.

## Our Maintenance Performance

The Maintenance department at Ekhmad provides comprehensive services for maintaining Fire Fighting & Alarm, as this department provides operation services as well as all corrective and preventive maintenance works for residential and commercial complexes and industrial facilities. Ekhmad is proud of its Teams and Innovative technologies, which represent the essential elements needed to provide modern solutions.

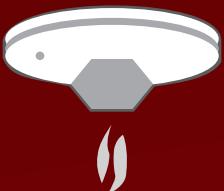

### Services offered by us:

- Fire alarm and firefighting systems
- Electrical maintenance services.
- Operation and maintenance (preventive and corrective) for the various client's facilities, headquarters and branches
- Operation and maintenance of various air conditioning systems (chillers, PACU, and split units).

### Work Completion Report

Date: Tuesday, February 25, 2020

Contract No.: SA-SHH-CON-1003-17

Project: Suleiman AL Habib Hospital, Al Khobar

Final Completion

Description/ Scope: Supply, Installation & Commissioning of Fire Suppression Wet System including the following items:

- |   |  |
|---|--|
| 1. Horizontal split case diesel engine fire pump with auto controller     | 7. Pendant sprinkler with piping                             |
| 2. Horizontal split case electrical engine fire pump with auto controller | 8. Zone control valve assembling                             |
| 3. Vertical multi stage jockey fire pump with auto controller             | 9. Fire Hydrant  |
| 4. Fire hose reel cabinet system  | 10. Fire extinguisher CO2 and Dry powder [Manual+ Automatic] |
| 5. Landing valve with hose cabinet system                                 | 11. Three-way roof manifold                                  |
| 6. Upright sprinkler with piping  |  |
